Abstract

The following work is a detailed analysis of the notions “democracy” and “Political representation” in the point of view of some of the wellknown authors. Our theoretical-phisolophical observation inculeds the period of antiquity in the Early Greece, the origin in time and space, where and when the first foundations of a democratic state were layed. Later on this work studies these two main concepts in the continuing era and their transformation up to this day. The researcher of this writing, despite of his ambition and diligence, is aware of the fact that neither old or new studies on this topic or all of them together despite their depth and care is whole and let alone final, when they try to shed light on the etimiological roots of human democracy, on the gaps that it needs to overcome nowadays as well as on the future.

Keywords: people, democracy, concept, power, philosophy, principle, freedom, rights, representation.
